DETAILED ACTION

Summary

On August 14, 2006, a final office action was sent to the Applicant rejecting claims 3-11, 13-21, and 23. On September 7, 2006, the Applicant filed a request for reconsideration. Prosecution has been reopened. A non-final action follows.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 3-11, 13-21, and 23 are rejected under 35 U.S.C. 102(a) as being anticipated by Kiel (2003/0027549).

Kiel discloses a method and corresponding apparatus for a prepaid communication system comprising regulating data consumption in a wireless network, storing an account for each of a plurality of subscribers of the wireless network, each account having an upstream and a downstream balance that tracks a wireless network data consumption of the respective subscriber of the wireless network, imposing a bandwidth limitation on a subscriber of the wireless network responsive to either the upstream or downstream balance of the account of that subscriber of the wireless network dropping below a defined level, and for each account, crediting the balance of the respective account on an

intermittent basis (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35—the Examiner is interpreting data transmission "to" as being upstream and data transmission "from" as being downstream); imposing the bandwidth limitation includes causing an existing bandwidth limitation to be more restrictive (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); crediting is performed on a periodic basis (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); crediting includes crediting the balance of each account by an amount that depends upon the balance of the respective account (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); reducing a bandwidth limitation on one of the subscribers responsive to the balance of the account of that subscriber rising above a predetermined level (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); reducing includes releasing the bandwidth limitation (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); for each of the subscribers, reducing the balance of the account of the respective subscriber by an amount based upon a volume of network data consumption by that subscriber (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); sending information to each of the subscribers indicating the balance of the account of each respective subscriber (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); the upstream and downstream balance for each account is presented to the user (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); the balance for each account is a burst balance (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); imposing the bandwidth limitation includes imposing the bandwidth limitation on the subscriber responsive to the balance of the account of that subscriber dropping below a defined level and at further depending upon least one of a time of day and a current network congestion level (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); regulating a bandwidth available to a network subscriber

based on whether a predetermined volume of data has previously been consumed by the subscriber (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); the bandwidth is regulated based on whether the predetermined volume of data has been consumed by the subscriber over a defined window of time (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); sending information to the subscriber indicating whether the bandwidth is being regulated (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); the wireless network is configured to regulate a bandwidth available to one of the subscribers based on whether a predetermined volume of data has previously been consumed by that subscriber (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); the apparatus includes a computer coupled to a database, the database storing an account balance for each of the plurality of subscribers, the account balance depending upon a volume of data previously consumed by a respective subscriber (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35); and computer is configured to regulate the bandwidth available to one of the subscriber responsive to the account balance of that subscriber dropping below a defined level (p.1, 8-9; p.2, 21-22; and p.3, 26 and 35).

Response to Arguments

Applicant's arguments with respect to claims 3-1,1, 13-21, and 23 have been considered but are most in view of the new ground(s) of rejection.
